New functionalities API – Pickups PMD

In the API version 1.1 (Connection via OPEN ClientID) several new functionalities have been developed for the Pickups PMD.

Via DeliveryPickups:

- o the sender can create pickups;
- o the receiver can add their information to a planned Pickup;
- o planned pickups can be requested.

MyFost Partner API 1.1
The API for the machine-to-machine data exchange.

DeliveryPickups

GET	/api/v{version}/deliveryPickups	Get a delivery pickup
POST	/api/v{version}/deliveryPickups	Create a delivery pickup
GET	/api/v{version}/deliveryPickups/toCouple	Delivery pickups to couple
POST	/api/v{version}/deliveryPickups/byContractLine	Create a delivery pickup by contractline(s)
POST	/api/v{version}/deliveryPickups/receiverUpdate	Update a delivery pickup by receiver

The API version 1.1 uses Open ClientID to connect. The version 1.0 – basic authentication will disappear in the future.

More information about the 1.1 version is available in the 'Help & FAQ" – How to use the API?
